Report of Proceedings

INVENTORIED WR 15 MT

Hearing held before

Senate Select Committee to Study Governmental Operations With Respect to Intelligence Activities

Friday, May 9, 1975

Washington, D. C.

(Stenotype Tape and Waste turned over to the Committee for destruction)

WARD & PAUL

410 FIRST STREET, S. E. WASHINGTON, D. C. 20003

(202) 544-6000

. 1

TOP SECRET

Chairman Church. The first item on the agenda today relates to the question of subpoenas.

First of all, I would like to call the Committee's attention to Rule 5 dealing with subpoenas.

"As much as for attendance of witnesses or the production of memoranda and documents, records or any other material may be issued by the Chairman or any other member designated by him after consulation with the Vice Chairman. It may be served by any person designated by the Chairman or member."

At the first meeting of this Committee our records show that we did discuss the subpoena question and I indicated then that any time that it became necessary to consider the use of subpoenas I would indicate generally to the Committee the field of inquiry for which the subpoenas might be required before issuing them, though the Rule gives me the authority to do so after consultation with the Ranging Member. Now we have reached that point where it may be necessary for subpoenas to be issued in connection with the following investigations that are now underway.

First off the Huston Plan where we will commence taking depositions requiring testimony under oath, detailed questioning in this connection. I believe the plan is to start with Huston himself and others. It is very likely in order to get a full disclosure from these witnesses, some of whom may be hostile, subpoenas may be required.

Phone (Area 202) 544-6000

WARD & PAUL

TOP SECRET

Senator Tower. Do you plan first to ask them to come to testify under oath, then if they refuse only then subpoena them?

Chairman Church. That is correct.

Senator Tower. I think that is the best way.

Chairman Church. I do, too. We will not use subpoenas unless it becomes necessary, but I wanted the Committee to know that we are now at that point and if it becomes necessary I will issue subpoenas in connection with the Huston Plan.

In connection with the Post Office mail opening, here again we have a situation where some of the Post Office employees, I understand, may have violated criminal laws and may be subject to possible prosecution. For that reason, in order to get the facts concerning this case, it may be necessary to use subpoenas to bring them in and testify.

In the Martin Luther King case, we have a similar circumstance. Would you care to --

Mr. Schwarz. Martin Luther Kind is an illustration of where a man who we have already interviewed, from whom we now need sworn testimony, has indicated that he would like to have a subpoena to bring him in. That is going to be another typical situation, people who are willing to come but would prefer to have a subpoena.

Senator Goldwater. Let me ask a question of the Martin Luther King incident.

TOP SECRET

What does that involve?

Mr. Schwarz. It was the subject of a good deal of questioning of Mr. Katzenbach on Wednesday. It involves initially a tap on his phone, then a bug, allegedly, in certain hotels and residences in which he was staying. Then a bug at the Atlantic City Democratic Convention in 1964, which may involve problems of not only his conversations with people involved in that convention but private conversations.

And finally, Senator, it involves the dissemination of the material that was obtained, much of which dealt with his personal life. And the allegation has been made that it was shown to reporters and other people.

Those four areas.

Senator Goldwater. Could I say something off the record?
(Discussion off the record.)

Senator Morgan. I say this for the record.

First of all, let me say I agree with Senator Goldwater with regard to the use of any derogatory information. But from the testimony of Mr. Katzenbach earlier this week, I frankly was disturbed at the former Attorney General of the United States admitting that he heard reports that the tapes were possessed by the Federal Eureau of Investigation and were being made for members of the press, and that he made an inquiry as to whether or not they were being made available to the press but he did not pursue it to find out why the FBI

Phone (Area 202) 544-6000

g

WARD & PAUL

TOP SECRET

had these tapes or for what purpose or whether they did have them nor not. And so that we will not forget to pursue that matter further. I wanted to say this for the record: That I think it should be pursued. Martin Luther King was a controversial leader but there are a lot of controversial leaders in this country, and unless they had some reason to have these tapes, and I think that is the kind of thing that this Committee ought to be concerned about, and I wanted to pursue it with Mr. Katzenbach last week but I thought maybe we ought to go gently until we got all of the information we could and then come back to the more difficult parts.

Senator Tower. My view is I don't care to listen to a tape with derogatory information or material on Martin Luther King, on his personal life or anything else. If it involved some subversive activity or something like that it would be a different story, but I think what we need to establish is whether or not this was illegally done and why and by whom, and all this sort of thing. That is what we want, not the tapes.

Chairman Church. I am in agreement with what Senator Goldwater has said and what Senator Morgan has said. The idea is to find the illegalities of the procedure.

All right. With that in mind, then, I would like to proceed if necessary with subpoenas to get at the procedures where use in any case which is a matter of our interest.

The next case for which subpoenas may be necessary comes

.

Phone (Area 202) 544-6000

TOP SECRET

by the intriguing name "Tommy Traveler." I would like our Counsel, Fritz Swarz, to tell us about that.

Mr. Swarz. This is an issue really under the agent provocateur question. Mr. Tommy Traveler, who has another name I don't know, was a student at a college in the Midwest who set up a lot of campus trouble in the late 1970's. It then developed that he was in fact an informer for the FBI. This is something which is not down there and came to our attention.

Chairman Church. Just added to my agenda, I am sorry.

Mr. Swarz. He was involved, allegedly involved in campus activities. It has since been determined that he was connected with the FBI. There is a story of an initial denial, then an ultimate admission. He is somewhere in Pennsylvania now and is a person we know will not tak to us withou a subpoena, and the thought here would be, Senator Tower, this would be a little bit of the footnote on the point you made that we would have in hand a subpoena, go to him and ask him if he would talk with us, if he says no, as is the strong information, then someone would be able to give him a subpoena rather than having to take the money and take two trips to Pennsylvania and find him.

Senator Hart Of Colorado. Mr. Chairman, is the suggestion of the staff that that is an isolated phenomena or that Tommy the Traveler represents in effect a case study of a common practice?

TOP SECRET

First Street, S.E., Washington, D.C. 20003

PAUL

TOP SECRET

Chairman Church. We are endeavoring to find that out -- a starting place with Tommy the Traveler. I believe that is the approach.

Senator Hart of Colorado. If it appears on preliminary investigations an isolated phenomena, is it the thought of the staff we should pursue it anyway?

Senator Schweiker. Let me say I don't know it is an isolated case. We have a case in Philadelphia where the FBI informant led the draft card raids and burned the draft cards.

Senator Hart of Colorado. Are we pursuing this fellow because he is an interesting fellow or represents a tendency or practice?

Mr. Miller. A generalization.

Chairman Church. That is what we are trying to see, how widespread this practice may be.

Senator Goldwater. We have a case out in Arizona where a professor at Arizona State was dismissed and now he charges that the FBI is responsible. I would like to get into that.

Senator Schweiker. I would like to have the Philadelphia case in there too. I would like to know who led the raid.

Chairman Church. I wish the Senators would often speak
up this way so that the staff could move in the right direction.
I think th-se are cases that should be investigated to determine how widespread this practice has become.

Senator Schweiker. It incidentally was Camden, across from

the City of Philadelphia.

Chairman Church. Yes.

Senator Schweiker. The same thing.

Chairman Church. The final item on this agenda today of subpoenas has to do with an organization that was apparently set up by the FBI under the guise of being a subversive organization called "Red Flag". What its purposes were are not entirely clear, though apparently it was like fly paper, to attrack possible subersives. It would be an exercise or possible exercise in entrapment. We don't know but the staff thinks it needs to be looked into more carefully. What is known is that the person who was engaged, allegedly engaged by the FBI to set up this device, now has a post office box in Texas. The staff has tracked downthe post office box but in order to find out where the person himself lives it is necessary to serve a subpoena on the local post office and then we can secure that information.

So this is just a technical method of proceeding to find the person himself.

Senator Tower. Where is this in Texas?

Chairman Church. Stafford, Texas.

Mr. Schwarz. Our shot on this subpoena, perhaps we could get through the back door from the post office, but we ought to be very vigorous using proper procedures ourselves to avoid doing the things that some other have done.

Phone (Area 202) 544-6000

WARD & PAUL

TOP SECRET

Senator Tower. Let's don'e us do something illegal.

Chairman Church. That is right. And you must also be mindful of that -- we always move within the proper procedures.

May I have a motion then. I don't need a motion really under the rules, I have advised the Committee. If there is no objection on the part of any member of the Committee we will proceed to issue subpoenas where necessary in connection with these investigations.

Senator Tower. Huston was before the Armed Services
Committee last year in connection with the Huston Plan.

Chairman Church. I think we should report to the

Committee that we did have a meeting with the Vice President

and it was a very plesant meeting and we were very skillfully

finessed. The Vice President said that he understood why we

would be interested in the raw material, the transcripts and

other information. He concurred that it would expedite our

procedures, he believed with us that the national interest would

be served if we could stay on schedule. He would relay our

request to the Commission, but that since the Cormission was a

creature of the President the request would then have to be

relayed to the White House. So we are back on square one.

Senator Goldwater. I think he will let us have them.

They are trying to get that report out by June 11th.

Senator Tower. June 6th.

Senator Goldwater. I think some of the things he has

TOP SECRET

NW 54653 DocId:32423498 Page 13

Phone (Area 202) 544-6000

WARD & PAUL

should stay in his own until they are published, because I think it is an area we don't want to get into.

Chairman Church. What the Commission does with its information is up to the Commission, but the raw data should then be made available to us. It would greatly expedite our own inquiry.

All right, the second item on the agenda is a proposed resolution concerning information from the Internal Revenue Service.

Now, this resolution has been suggested to the Committee staff by the Internal Revenue Service. It is in order to expedite their compliance with our requests. There is a provision in the law, one or two provisions in the law, that inhibit the Internal Revenue Service from furnishing some of the information that we have requested, and they believe that if this were waived for purposes of this inquiry, the Senate inquiry, it would then be helpful to them.

Senator Goldwater. What is the nature of the material?

Mr. Schwarz. We don't want tax returns, Senator. We are going to be looking into certain allegations of wiretapping by the Internal Revenue Service, break-ins by the Internal Revenue Service. I don't think in fact that that sort of stuff ought to be covered by a statute that says tax-related material, but it may be, and they have suggested that it would expedite their giving us the material if we get a resolution like this. It is

the same resolution in substance that the Watergate Committee and I think the House Judiciary Committee in the past, I know the Watergate Committee did, and it was suggested to us by the Commission we don't want to return.

Senator Goldwater. In our resolution which created this group, what if we wanted to get into the operation of the IRS harassment not against certain individuals but constant harassments. I know if you once get on the computer list you never get off that list, and I would like to know why.

Senator Tower. What Alexander suggested here is that he is willing to give us the information but he wants to have his skirts legally cleared by a Senate resolution.

Mr. Miller. Other Committee jurisdiction.

Senator Goldwater. Could you get into the matter. To me it is like wiretapping a lot, where they put you on the computer and I want to know why and why it is that once a man gets on that computer he never gets off, even though he is never found guilty of anything. It is harassment, harassment, harassment,

Chairman Church. I think that does come within our purview.

What we are really concerned about in connection with all of this information is big brother Government developing in every quarter?

Senator Schweiker. Abuse of authority.

Chairman Church. And utilization of all kinds of

surveillance techniques developing and institutional practices in this country.

Senator Goldwater. I am with you.

Chairman Church. All right. Now, I have two questions to ask about this resolution.

First of all, Bill, does this resolution have to go to another Committee in the Senate before it goes to the floor?

Mr. Miller. That would be the usual.

Senator Tower. Post Office and Civil Service?

Mr. Miller. If you cleared it with the Chairman you could go right to the floor with it.

Chairman Church. Is it Finance or Post Office and Civil Service?

Mr. Miller. Post Office.

Senator Tower. This is IRS. This is Finance.

Chairman Church Internal Revenue Service is Finance.

Mr. Miller. I think you have to check with both Chairmen. But go directly to the floor.

Senator Tower. What you could do is, I guess we don't have a jurisdiction to report it out of our Committee. I think you would have to introduce it, Frank; what you could do is have it called up for immediate consideration and let somebody object and have it go on the calendar.

Chairman Church. Yes, I think we should clear that with the two Committe Chairmer first. They might prefer to handle

Phone (Area 202) 544-6000

WARD & PAUL

it that way.

All right, we will work that out, but I would like to have a motion by the Committee authorizing us, me, to proceed in this matter.

Senator Tower. I so move.

Senator Huddleston. I second it.

Chairman Church. Very well, without objection that is approved.

Item 3 on the agenda today is a discussion of the general pattern of staff work and Committee involvement between now and the commencement of full hearings.

I would like to hear from our staff but we are now at the point where the serious investigation begins. By that I mean we are going to be taking a lot of sworn testimony. We are going to begin to take an increasing number of depositions.

Under the Rules of the Committee, when sworn testimony is taken, depositions are taken, at least one Senator should be present to administer the oath, and Im soliciting the cooperation of the Committee members so that this work can move smoothly along. In every case, let it be understood in every case, whever a request is made, any member of the Committee can sit in on any one of these depositions, anyone that relates to a subject of particular interest to the member.

Furthermore, it would be preferable, whenever possible, to have a Majority member and a Minority member present, if

Phone (Area 202) 544-6000

ARD & PAUL

that can be arranged,	but we will need a lot of involvement no
by members as we move	into this serious aspect of the investi-
gation.	

Senator Goldwater. Could I make a request? I know it is not entirely practical, but if we can have some idea of the dates that you want us it would be a great help to us. We are planning on August off. I can be here whenever you need me but I would like to know far enough in advance.

Senator Tower. I think we should set up a schedule and say one of us will be responsible for being here that particular day, anybody else can be there that wants to be. Let everybody know when his duty day is.

Chairman Church. Yes. Or we couldpublish the schedule and ask the staff to secure a member.

Senator Goldwater. Can you set up a schedule?
Mr. Miller. Yes sir.

Chairman Church. Yes, for these depositions.

Senator Goldwater. That is all we want. We can take our share. That is no problem.

Chairman Church. But it will be going everyday.

Senator Schweiker. Where will they be done?

Chairman Church. In different places. Some over in our own staff --

Mr. Miller. Being an orphan Committee we may have as many as four at the same time.

Phone (Area 202) 544-6000

1,2

Chairman Church. I just think as a practical matter we will probably find that we will end up oftentimes with just one Senator present. We can't get the job done any other way.

All right. Now, what else do we have to say on this subject?

Mr. Schwarz. Just discuss it.

Chairman Church. Anything else?

Mr. Smothers. No; I think that will work find for us. I think it ought to be clear what we will try to do is fet as much information in that particular hearing. By and large the staff will do the questioning.

Chairman Church. I would like to bring up this time the Washington Post article because if there are any doubts about this story I would like to clear the air right now.

There was an article in the Washington Post yesterday, a good article except for one inaccuracy, a rather serious one, and I would like the advice of the Committee as to how we should handle it.

The part at issue reads as follows:

"One Administration official said, I hope I am not being paranoid, but he said the Committee staff claimed later that the apparent selectivity was unintentional. The staffers finally left after checking off the ones they wanted and informed later the White House as chagrined to note they had asked only for reports of operations that originated in either

TOP SECRET

410 First Street, S.E., Washington, D.C. 20003

Phone (Area 202) 544-6000

ARD & PAUL

the Eisenhower or Nixon Administration."

This simply is not so and the staff has prepared a memorandum which is in your folders which will show you the pattern of the inquiry had paid no heed whatever to partisanship in connection with this inquiry. And since we have tried very hard to avoid this, it is a bit disturbing that that issue is being raised at the White House when there is no substance to it.

Mr. Miller. I can elaborate a little bit on that. I understand that that story grew out of a Christian Science Monitor breakfast at the White House, or a Rod Sperling breakfast, which I think many Senators are familiar with. It was held at the White House, and almost all of that information, as far as we can determine, arose from that meeting.

But to elaborate a little bit more on this study question. I have gone over that list, Mr. Bader has gone over the list in great detail several times in order to be sure that we were not asking for anything that was not directly concerned with the mandate, and to be certain that the studies or reports or case evaluations affected all Administrations without any bias. It is an interesting collection, this 400 documents, and we have limited it to matters that seemed of direct concern and well within the authority of our mandate, and we have given to the White House and to the CIA at their request the studies in order of priority in order to assist them in the process of

Phone (Area 202) 544-6000

WARD & PAUL

looking them over where appropriate. Whatever initial friction
there may have been on that I think have been resolved. I
think the White House is satisfied now and I know the CIA is
because they made those documents available on a basis that is
satisfactory to us.

Senator Goldwater. Let me ask you, do you think that this statement is a statement coming from the White House or is it a statement coming from George Lardner?

Mr. Miller. That I can't be certain of. That I can't be sure of. The only thing in looking into the story, I do know that there was a breakfast and I do know that those matters were discussed in detail.

Mr. Schwarz. And we do know it was made to it first about two weeks ago and we said it wasn't true. It was made by the White House. We said it wasn't true. Mr. Kirbow just this week said to the White House it was not true.

Mr. Kirbow. Senator, one of the counsels to the President showed me a copy of an internal memo where he was trying to make that case in the memorandum. He went over it with me and showed me paragraphs. I then looked at it in great detail against our request and indicated to him at the time he could not make such a case with me and I had been very concerned about this matter at the outset of our document request, as the Staff Director knows, and had screened them personally

any given segment of our Administrations. He indicated nothing at all further as to what he intended to do with the memorandur but it was the next day that this came out.

Senator Goldwater. Have you talked to Lardner and asked him his source?

Senator Tower. He is not going to give his source.

Chairman Church. He won't give it.

Senator Goldwater. If we stick by our rules we are going to be sugject to this day after day. If it is going to be a White House source, we can stop that. If it is going to be a newspaper, I think we may be able to do something about that.

Chairman Church. Let me say this about George Lardner.

He has interviewed me several times and based upon the stories

he has written they have always been accurate, and so I have

no personal reasons to suspect that --

Senator Goldwater. Do you mind if I look into this? Chairman Church. Not at all.

Senator Tower. Let me suggest this. Let's go back to the White House and say you know this isn't true, why don't you clarify it, and then if they don't, we do.

Senator Schweiker. I think that is a good idea.

Chairman Church. I think it is, too.

Senator Mart of Colorado. I think that the following statement, if they do not clarify it, a statement from the

Phone (Area 202) 544-6000

.21

WARD & PAUL

ranking Minority member would be inorder.

Senator Goldwater. That is why I would like to get this thing cleared. We are going to be subjected to a lot of this.

Senator Tower. I am reasonably sure a member of the White House staff said that to Lardner. I am not positive because I know the newpaper would like to promote a big fight between us and the White House. I think we ought to get the White House.

Chairman Church. We have been trying very hard not to pick a fight and we are not going to pick a fight unless we have to; but it may he that at the press conference following this meeting the question could come up. If it does come up, I will say, and John Tower has been with me at these press conferences — it would be helpful if he would say we have looked at the record of the general requests and there has been no partisanship and no basis for such a charge. But it would be helpful that if that subject doesn't come up if we could get the White House to —

Senator Tower. As soon as this meeting is over I will get on the phone.

Chairman Church. All right. All right, now, Bill Miller has asked me to announce in order to accommodate Senators on the Committee who need to be planning for vacation time, that we should set aside, I suggest this to the Committee, the last two weeks in August for a vacation period.

Senator Tower. Good.

Chairman Church. Then we can all plan on that and that would take us over the Labor Day period. All right?

Is that satisfactory?

Senator Schweiker. Let me ask one other question, Mr. Chairman. Do we now envision the holding of public hearings for the first two weeks of August, because I think if we are not in the public hearing stage we all have a little more flexibility in terms of things.

Chairman Church. I would anticipate since we will be getting into the public hearings in not later than July that we probably will have some public hearings in the forepart of August, and what we have tried to do here is compromise the recess issue by setting aside the last two weeks for that purpose. I would anticipate there would be some public hearings in the early part of August.

Senator Schweiker. I make this request, and I appreciate what you are trying to do here. If we have an option as to time, as time gets near, as to closed or open hearings, if it doesn't impede the work of the Committee we try to increase this period of closed hearings, if it doesn't impede or hurt.

Chairman Church. We will do the best we can with that without making any commitment.

Now, Senator Hart would like to raise a question concerning his discussion he had with the Attorney General. It would

Phone (Area 202) 544-6000

ARD & PAUL

be appropriate at this time to do that, so you have the floor.

Senator Hart of Colorado. Well, I think at one of our recent meetings, maybe the meeting before last, I suggested that those of you who wished, should authorize the Chairman to request of all intelligence agencies our own personal files.

It was met with mixed reaction. At the staff's suggestion

I pursued it independently, and not independently but personally with the Asistant to the Attorney General earlier this week, and essentially he said in my capacity as a member of the Committee I would like to see my own FBI file.

Well, thereupon ensued a kind of long rambling discussion about the dangers of disclosing vital information and yet the competing interests of a democratic society, and it was one of these philosophical things and I kept trying to get him back to the point that all I wanted to do was see my file -- on the theory that one of our tasks is to find out how agencies of this sort compose files on individuals. In my case I know they have one because I used to work for the Department of Internal Security area and had a security clearance. I suggested it was a lot more appropri, te for me in this capacity to see my own file than to see somebody else's, quite obviously.

Well the struggle was he wanted to convert this into a request, a rather routine reques under the Freedom of Information Act, which would have had the following consequences:

One, it would have put me way down the list of literally

Phone (Area 202) 544-6000

hundreds if not thousands of requests under the Act.

Two, he stated quite frankly, as he did in his speech in New York at the end of April, these requests, because they are so numerous, are now automatically exceeding the time limit under the legislation, which is the 20 days. If you are not satisfied in 20 days you have the right of appeal to the Attorney General at the courts.

I said I didn't want to get into that, all I wanted to do
was to see my file. He said, surely I didn't want to move myself
to the top of the list because I was a member of Congress?

Again I kept reiterating that wasn't the issue at all.

Essentially the way I left it was I would send him a letter over
my signature, over the Chairman's formalizing the request in the
capacity as a member of this Committee and he wanted me to agree
with him that my presence there in his office was a request
under the Freedom of Information Act which would have begun to
run the time under the legislation under the Act, and I wouldn't
agree to that.

So thqa is essentially where that is. And the only reason I bring it up is to let other Committee members know what I am doing and, two, it fits into the pattern of what we have experienced with other agencies of delay and resistance and so on.

So that is where that thing stands, but I am going to go ahead and send the letter. We will send it out the first of

1.

the first of the week.

Senator Morgan. If you send the letter under the Freedom of Information Act, have you set a precedent for the rest of us?

Senator Hart of Colorado. No, I am not going to do that.

I am going to do the opposite, on the advice of counsel, if it is forthcoming. My inclination is to specifically state in it that it is not a request under the Freedom of Information Act but is a request to be considered as part of the continuing work of this Committee, and so on and so forth. But again I don't want to get cross-wise with my colleagues here, and if any of you think I am doing something I shouldn't I would like to know about it. I don't want to provide a barrier roadblock for the work of the Committee.

Chairman Church. Any discussion?

Senator Morgan. What I would like to see done is maybe

Mr. Schwarz could go down either alone or with some Committee

members as would like to go and say here we are, do you have a

file and show it to us. The difficulty is I don't trust them.

What is going to be in the file when you give them all this

advanced notice?

Senator Hart of Colorado. They can delay you. If that is your worry, they can delay you while you sit there.

Senator Morgan. They can? I think someway or other we have to decide who can run the show.

.7

Senator Tower. Meantime the secretary is back there plucking your file.

Senator Huddleston. The only suggestion I have would be I don't know why Gary should be hanging out there by himself. We should determine the proper course and I would like to see mine, too. I would like to incorporate in a letter all of us who would like to see them and indicate to him this is part of our investigation.

Senator Hart of Colorado. I didn't want to drag others in that didn't want to be involved. Some suggested they didn't want to see their files.

One other thing I think is worth noting here. He kept referring back to the Act. Under the Act I have the authority to remove any information with regard to potential criminal investigation of you and expunge information coming from informants, to use a very serious term, whose own right of privacy would be violated by disclosing that information to you. I didn't know that informants had a right of privacy, but that is the Attorney General's opinion at this point. So what he can do here, Bob, is go through there and every time your neighbors, when they went back and did the security clearnce, said I knew him when he was in the 7th grade and he seemed to be patriotic at that time, he can go through and cut that out to protect your neighbor's right of privacy, which means you are going to get a big piece of swiss cheese for a file -- on the

ground that you have to protect the right of privacy of every
informant. And, by the way, that has been the implication, it
seems to me, for all the rest of what we are doing. If that i
the opinion of that agency, whether it carries over to other
agencies as well, we are not going to see a thing, because all
files are based pretty much on informants, I guess, unless an
agent happens to observe you doing something you shouldn't, and
they feel they have the right to cut all that stuff out to
protect the right of privacy of informants.
Senator Huddleston. That phrase might be used in a poten
tial criminal investigation, too.
Senator Hart of Colorado. Yes sir.

The real issue, as I perceive it, is Chairman Church. whether this Committee operating under its authority pursuant to the resolution is entitled to examine such files beginning with files that may be kept on members of the Committee itself. outside of the purview of the Freedom of Information Act. Those precedures under the Act do permit certain material being expunged and the question is whether that Act is going to control access by this Committee to such files. I suppose without undertaking to request files on individual members who do not iwsh them it would be entirely appropriate for me to write such a letter to the Attorney General, including within it specific requests covering those members who do wish to see their own file. Then we place the issue on his desk.

Senator Tower. I have no objection to that. I don't care to see mine.

Senator Goldwater. When I first came here you could go down and they would take a thumb print and within two minutes you had your whole file in front of you. They have changed things. That demonstrated how good they were. That file is that thick now.

Senator Huddleston. I may not even have one. It seems to me you are right, we ought to first of all establish we have that authority and right, and in satisfying that right we make good by looking at our own files instead of looking at somebody else's. That seems to me to be a very simple approach.

Senator Morgan. I think you ought to make it clear, Mr.

Chairman, you are not requesting under the Freedom of Information

Act and warn them that no matters or records should be expunged

or deleted from the record. I agree with "Dee". I think we

ought to take a look at some and it is far better we look at

our own than look at some other person in the Congress.

Chairman Church. We must be careful in composing the letter not to suggest that we are limiting our right for access to other files simply because we are asking for the files of members.

Senator Morgan. I think the Committee should be doing what you or someone else suggested earlier, composing a list of about 500 people in and out of Government that we would just like to carry down and say do you have files on these people?

TOP SECRET

If so, make them available. And we can't check 10,000 people, we can't say give us a list of these people. I could sit down in a few days and come up with people that I would suspect they had files on.

Senator Goldwater. Or should have.

Senator Huddleston. I think the crux of the thing is why they have them and how they got them.

Senator Hart of Colorado. Mr. Chairman, I think the real legal loggerhead that we are headed for here is this issue of the so-called right of privacy of an informant. If he is serious about that, that has devastating consequences for the work of this Committee.

Mr. Schwarz. It is the same problem as we are running into in a number of areas, and the premise in every case is the fact that the Committee gets a document means that it is going to be on the street the next day. Now, the rules are very clear it is not going to be, and once this Administration believes this Committee's rules, then they don't have that excuse. That is really the issue.

Senator Hart of Colorado. I think he is going beyond that He is saying, one, a Senator or set of Senators, even acting in this capacity, has no right to see what an informant says about them or anybody else. I think he is saying delivering it to this Committee is violating that informant's right, not that it might get out on the street.

Phone (Area 202) 544-6000

TOP SECRET

Senator Goldwater. There are problems that have come under the new Secret Act or Public Disclosure Act IRS is running into. It was on my desk last night. He is evidently getting ready to ask for changes in legislation so IRS will have a little more leeway. I suggest you get a copy of that letter. Each Senator got one.

Chairman Church. You see, there is always a reverse twist in the best intended efforts and it may be that with the passage of the Freedom of Information Act, we have furnished the Executive Departments with a legal basis for expunging information and withholding information they may not have had before, and thus the Freedom of Information Act becomes a shield when it was intended to be a sieve.

Senator Hart of Colorado. In which case we may have to amend our own authorizing resolution to point out our authority goes beyond that Act.

Chairman Church. Well, let's proceed then with such a letter and wee where it leads.

I think that it might be well in this case if John Tower joined with me in signing the letter.

Senator Tower. I will join with you in signing it, but I don't want my file.

Chairman Church. All right. And one other thing. Will you please advise all members of the Committee what we have decided to do so that every member who does want his file may

have an opporutnity to be included?

Mr. Schwarz. Yes sir, we will circulate the draft letter.

Chairman Church. Yes, I think that might be advisable.

All right, now I want to go down to Item Number 5 and then reserve Item Number 4 for the last of this meeting.

Item 5 has to do with the statuse of outstanding document requests and status of procedures.

First of all, do we have any further requests to approve today for information?

Mr. Schwarz. None today.

Chairman Church. What is the status of our outstanding requests?

Mr. Schwarz. I think that can be very quick. The White House itself has delivered the documents we have asked for with two exceptions, but Bill and I have seen those. That doesn't mean there are no White House problems but the White House itself has delivered the documents.

The CIA is doing much better but they are blacking out significant portions of documents and whole areas of other documents, perhaps the most important of which relates to this assassination topic which comes later on the agenda.

The FBI is being awfully slow and we are in negotiations with them right now to try and speed that up. If we don't succeed I think we may be coming back to the Committee next week for some kind of request for action from the Committee.

The interview procedure matter is meant to refer to the
so-called monitors which you were all informed about ten days
ago. The Administration initially suggested that they have the
right to have a monitor present at every interview we have of
a current or former Administration employee. We have told them
that we do not agree to that, that to have a monitor present
is inconsistent with an investigation, particularly in the area
of the alleged abuses, and would impede the freedom with which
someone would talk, and would also have a very bad appearance.
It is the same kind of problem as occurred in John Dean being
present at all of the interviews taken in the first instance
in the Watergate inquiry. As a matter of appearances it is bac
and as a matter of substance it is bad. We have been very
adamant on it.

I think it would be helpful to have some views from the Committee on that.

Chairman Church. You understand exactly what is involved here?

I think it is inconceivable that we would Senator Morgan. interview an employee or former employee with his former supervisor sitting there watching everything. I would object to that procedure.

Senator Tower. Obviously we can't do that. I don't think we can either.

We would be the laughing stock of the Senator Schweiker.

TOP SECRET

Chairman Church.

Phone (Area 202) 544-6000

22.

Hill.

Chairman Church. Phil Hart has indicated a similar view, though he couldn't be present this morning. I think that it might assist in further negotiation on this question if the Committee were to formally resolve --

Senator Tower. Mr. Chairman, I move that we not accept the suggestion that a monitor be present with each witness.

Senator Hart of Colorado. Second.

Chairman Church. And we notify the agencies to this effect?

Senator Hart of Colorado. Strongly.

Senator Goldwater. Where did this come from?

Mr. Schwarz. From everybody. CIA put it forward first.

They said they were acting for the whole community. And indeed the White House mentioned it first.

Senator Schweiker. There is a story going around the media to the effect that there is some internal memorandum that the White House has saying they don't have to give any of these documents up and may well decide not to do it on the real big ones. I am wondering if that is gossip or is there any basis for that and part of this monitor position that they are taking? I am just raising it, it is scuttle butt. I have had media ask me about it, do you know anything about that, that they have an internal document coming up that pretty well says that they feel on their rights they are going to refuse certain key

Phone (Area 202) 544-6000

1.3

410 First Street, S.E., Washington, D.C. 20003

documents.

Mr. Miller. We have not seen anything to that effect.

Senator Huddleston. That is a typical tactic of the media.

Let me point out, as I have tried to point out a few times, this is an approach they like to make to get some kind of information.

If you had responded that you didn't know but we will get our documents they had a story right there.

Senator Tower. They have already asked us questions -have they indicated they are going to invoke Executive Privilege
on something, or when they do invoke Executive Privilege what
are you going to do about that kind of thing?

Senator Huddleston. A good investigative reporter will use that kind of tactic, frankly.

Chairman Church. Let me say a word on that, and I have said this each time the press has raised the querstion. So far no Executive agency has refused to turn over documents that we requested. Until we have reached that point, unless we reach that point, we are not at issue on that question. It is possible that certain parts of certain documents that we are requesting will turn out to be very sensitive and some parts may not be related to our inquiry.

John, I think you might mention to the Committee what you mentioned to me today that relates to this question. I would like to have the Committee's approval. If the Executive, if the White House or one of these agencies feels that a part of

Phone (Area 202) 544-6000

ARD & PAUL

a given document we have requested is of a highly sensitive nature and does not relate to our investigation, they would like to show that particular part to Senator Tower and me so that we might determine whether or not it relates to the work of this Committee, and if in our judgment it does not, we would come to the Committee and say so, in which case that part could be deleted from the document that is turned over. That is my understanding.

Senator Tower. Yes.

Chairman Church. Of the question that was raised.

Senator Tower. Yes sir.

Chairman Church. What that entails is that someone on this Committee in such a circumstance has to make a judgment, and my view is that we would make that judgment on the basis of whether or not the particular item of information relates to the inquiry and, therefore, comes within our purview and not to be made available to the Committee or it does not. And If we find it highly sensitive and outside the scope of our investigation, then we would tell you and you would have to accept our judgment.

I don't know of any other way of handling that kind of a case.

Senator Goldwater. I think it is very wise to do that.

Chairman Church. Any discussion? All right with you?

Senator Huddleston. Yes.

Yes.

Phone (Area 202) 544-6000

8.

VARD & PAUL

Senator Schweiker.

Senator Tower. This is a procedure that has been followed in other committees in regard to sensitive material. You and Stu Symington have gone and read some stuff once?

Senator Goldwater. Yes; and we are reading some more. It is done on the Armed Services Committee quite often, where they take one Republican and one Democrat and we will reach our own conclusions, and usually the conclusion that the Committee will accept.

Chairman Church. I would like to proceed that weay with the understanding that without revealing the details we would explain in each case to the Committee why we concluded that it was not within the scope of the investigation so that the Committee would be satisfied.

Senator Schweiker. Do I further understand, I think I do, that if the two of you would not be able to agree, that would not apply. If one of you dissented, if one read it one way and another another way?

Chairman Church. We would bring it back.

Senator Tower. Bring it back to the Committee and let the Committee decide.

Senator Hart of Colorado. What would be your collective inclination on matter in a gray area? Which way would you both tend to resolve it, or am I getting too hair splitting?

Chairman Church. I think that is very hypothetical. I

think until we see what it is we are in no position to make the judgment.

Senator Tower. My only personal inclination would be if we were in a gray area and weren't sure, we would go ahead and bring it to the Committee. We would not agree to expunge it.

Chairman Church. That would be my disposition, too.

Senator Tower. It would have to be beyond really a reasonable doubt. Again I can't go any further than Frank.

Senator Hart of Colorado. I understand.

Senator Schweiker. Under that procedure you would see it all yourself, it wouldn't be somebody sanitizing something that you look at?

Chairman Church. No; we would see it.

Senator Tower. See it unsanitized.

Chairman Church. We can't make a judgment on any other basis.

All right, we have not formall acted on Senator Tower's suggestion with respect to a rejection on the part of the Committee to the monitoring that they have asked for, and so without objection, the Committee agrees that that proposition is rejected. We will so inform the agencies. And Senator Mondale gave me a proxy, so I would take it to be the unanimous view of the Committee.

Senator Hart of Colorado. Mathias?

Chairman Church. Senator Mathias I am sure would concur.

Chairman Church. And I intend to inform the press of that action.

Now, I would like to ask all the members of the staff if they would please excuse themselves.

Senator Tower. Do you want to take the nominations?

Senator Goldwater. I move they be accepted en bloc.

Chairman Church. All those in favor of the motion say aye

(Chorus of ayes)

Those opposed?

(No response)

Chairman Church. Very well.

I will ask members of the staff please to leave except our Counsel and Staff Director.

First of all, let me say how much I appreciate the reputation that this Committee is getting for conducting a responsible and secure investigation. We have tried every way so far and the cooperation of the Committee has been just superlative.

The issue of assassination is with us and I think the time has come for us to discuss how we will proceed with it.

First, let me say that indications are that the Rockefeller Commission has looked into this very seriously.

Also I assume, though I have not been told, the Vice President came very close to telling us, I think at our

1.3

conference with him I assume that the report of the
Rockefeller Commission will deal with this assassination
question, and it is important that we know all that we can know
beginning with the investigation that I will propose. First,
so that we can be adequately informed and in a timely way.

Second, so that we can then decide how this Committee proposes to deal with the question and what public disclosures we may feel to be necessary.

The first time I raised the question directly with Mr.

Colby was at the breakfast meeting preceeding our meeting with the CIA out at their Headquarters in Langley. Senator Tower was there and I raised the question prior to his coming, to his arrival at the breakfast. I then asked Mr. Colby to repeat to Senator Tower what he had told me, and this is what he said to us.

He said that there had been CIA involvement in several attempts against the life of Castro, that these attempts took place between 1960 and 1965, that obviously the attempts had failed, that Castro was aware of the attempts because at least in one case an agent of the CIA was captured, interrogated and Colby had no reason to believe that Castro was not fully informed by now.

Senator Morgan. He said so on the Today Show.

Chairman Church. He said so on the Today Show.

The matter has surfaced in the press. As you know, there

Phone (Area 202) 544-6000

18.

VARD & PAUL

TOP SECRET

is increasing comment on it. And there is little question but what more details will come to light one way or the other in the weeks ahead.

Colby said there was one other involvement. We did not question him closely, we just asked him to tell us what he knew about this question of political assassinations.

The other involvement had to do with Trujillo in the Dominican Republic. The involvement here was a little different. A group of insurgents, dissidents, whatever you might want to call them, who were very much opposed to Trujillo, were furnished weapons by the CIA. That group was the one that assassinated Trujillo. It happened that the weapon that was used in the actual assassination was not one that was furnished by the CIA, though at least one, perhaps more of the weapons that were furnished were in the car of the assassinators, and Colby said that this was an involvement that would at least in the eyes of the law, in his judgment, involve the CIA in a conspiracy.

He said there had been no involvement in the case of Lumumba and he did not volunteer any further information of involvement. We did not question him about the Diem or any other possibility.

I noticed that there was somehing in the press yesterday about Malagasa, an article having to do with Tad Zulc.

So the question is before us and it has these further

Phone (Area 202) 544-6000

8.

TOP SECRET

ramifications that I can see at the moment.

There is a growing and perhaps ill founded suspicion, but nevertheless it is a persuasive one on the campuses, that the CIA has not come clean or CIA might have in some way been involved in the assassination of President Kennedy. I find that utterly unvelievable but, nevertheless, you know that the suspicion is widespread. And I find it unbelievable and because I can't comprehend CIA would be involved in such a thing.

However, there are some unanswered questions concerning whether the CIA made a clean breast of everything it disclosed to the Warren Commission and whether the Warren Commission pursued the matter sufficiently.

One of these questions relates to the fact that Oswald did visit the Soviet Embassy in Mexico City prior to the assassination, and there is some confusion as to how fully this was disclosed to the Warren Commission.

Senator Tower. The other side of this coin that there is suggestion the CIA was involved in the assassination and there is right wing suspicion, it was a Communist conspiracy.

Chairman Church. Yes sir, both suspicions.

I assume agin from the apprearances and from all other reports that I have read in the papers concerning the investigation of the Rockefeller Commission that they are looking into this alleged connection with reference to the Kenndy assassination. They have even gone so far as to interrogate the doctors

who were present and who did the medical examination of the President's skull and made reports that the Warren Commission considered. So we have it on our hands.

Senator Goldwater. Can I give you my views on this?

I think we are getting into the field of danger I felt we would get into.

I know there is pressure to reopen the Kenndy thing. I can't believe that the Warren Commission didn't make an honest report, but that is not what bothers me so much. If we get into the assassination field we are looking at attempts on Castro's life or others. I think this is a field of activity that we should stay out of as far as the CIA is concerned or any other body. It is a part of intelligence that we just have to learn to live with and don't like.

I could tell you, I can't divulge names, the chances are we nver would have lost Purtugal had this big blow-up of the intelligence community in our country not bubbled up in the press media. Whether this involved assassination I don't know but I have real reason to believe Portugal would still be with us had we not literally destroyed our ability to operate in these foreign countries.

I can gell you that it is virtually impossible now for the CIA or DIA or any agency to get eyeball contacts in any foreign countries. We were never too good at it. We were beginning to grow. We were beginning to build a respectable intelligence

Phone (Area 202) 544-6000

TOP SECRET

community, but what has taken place so far has destroyed that, and I would be very strongly opposed to our getting into any of those type of operations, even including the Kennedy. I think it is better those things remain closed. It is better, too, that we not destroy a weapon, whether we like it or not. It is used against us and will be used against us. It has been used throughout history, not necessary assassinations, but destruction of character, destruct-on of property. I don't want to see us become the only country in the world that is devoid of any ability to operate. I would steer clear of that kind of clandestine type operation. I really mean that.

If you want to get into the Kennedy thing that is another thing. I personally would oppose that because I think this is a closed book and should stay that way.

Chairman Church. I understand your feelings and I don't relish the inquiry into this field but I believe that it is unavoidable.

First of all, I will be very much surprised if the Rockefeller Commission does not say in its report that these assassination attempts have been made. It will strongly condemn them because certainly we can not license murder in time of peace and will quite likely propose some changes in the law to make it a punishable offense. I just surmise that. But I think all of that is at least probable and we then are in a position where if we do not turn our attention to this question and reach

Phone (Area 202) 544-6000

TOP SECRET

our own conclusion respecting it, this investigation will look silly to the public.

When I say that I understand all of the reasons that lie behind your misgivings.

Senator Goldwater. I am trying to get this within the tenet of the resolution and I think we are safe when we say we are not going to get into the external things. Internal that applies to America is another horse. You can make these things illegal but in the interest of our country I can assure you they are going to go on.

We have this problem on the Armed Services Committee and I am on that watchdog committee and frankly, we don't want to know some of the things that go on. That is what I am afraid of that we are doing. Once we get outside of the basic charge of this Committee, which is to look into the espionage and other practices performed on our own citizens, then I think we can well destroy what little we have left in the field of intelligence and at the same time our enemies are stronger and stronger in the field. That is my personal feeling.

I would make one suggestion that we not decide this day; that we wait and see what the Rockefeller Commission does come up with. If they come up with it I think we are stuck.

Chairman Church. My proposal is this: There is every indication that the Rockfeller Commission has gone into this question and they are going to say something about it.

.3

7.

1.4

TOP SECRET

That brings me to the last exchange we had with Mr. Colby which you should know, and if you can think of anything else, John, I haven't related, please relate it.

Colby said that he knew that this would have to come to light in some way, that he was hopeful that when it did, the Administration was hopeful when it did, it was done in a way that did not personalize or particularize a particular incident and that the findings could be made that such attempts had taken place and that this had not happened in the recent past, it was not going on now, it was policy that was contrary to it, and then such recommendations as to the future that the Committee might want to make.

So he anticipates that the disclosure will come in an official way. He is concerned mainly about the manner of disclosure.

That makes me think unquestionably he is aware of what the Rockefeller Commission is planning to do and anticipates this Committee will have to do something as well. If at the time the Rockefeller Commission makes its report this Committee doesn't know anything about the subject and we have to say we don't know anything about the subject, it seems to me we are putting ourselves in a very awkward position.

How we deal with the subject is a different question. We will have to decide that ourselves. But Colby from all appearances is read to tell us all that he knows, and I think

וו

TOP SECRET

we should get from him his statement and then decide what other evidence we need to fill out the picture and then, of course, decide how we are going to deal with it. We can't make the decision of how to deal with it until we know what it is we are dealing with.

Senator Goldwater. I just want to get myself on record.

I am not going to stand in your way. This is something that
you and I probably have been exposed to more than most other
people in our lives, and you maybe get too close to it, yoou
live with these people, and you get damn healthy respect for
what you have to do and what we have to depend upon.

I am going to have to go. I wanted to express my opinion, and I will call the editor of the paper and get this cleared up.

I am not that close to him.

Senator Huddleston. On the case of Castro, was it our agents who were actually attempting to commit the act?

Chairman Church. We don't have the particulars but I judge from what Colby said, yes, that there were many discussions but there were in addition to discussions, attempts. He mentioned some of the ridiculous proposals that were made including — discussion of a submarine that was going to put an explosive in a seashell and blow him up while he was swimming, and he said that to illustrate some of the bizarre proposals that were made. But in addition to those proposals there were attempts, at least several, he didn't specify the actual number.

Senator Huddleston. Actual attempts?

Chairman Church. Yes. My own view is quite different from Barry's though I appreciate the reasons for his concern.

I just don't think that the United States can sanction political assassination in times of peace and that there is nothing that can be accomplished by this that possibly benefits this country as compared to the damage it has done to us all over the world, and one of the reasons we are in our present difficulty in my judgment in the world is because of the widespread belief that this has been an instrument of American policy, that the CIA has been the organ by which we have not only attempted to intrude in little countries in their own affairs, in every possible way, by which we have gong even to the point of assassination of foreign leaders.

I think for the sake of the country it has got to be stopped and this Committee has got to have a role in stopping it.

Senator Hart of Colorado. Could I pursue "Dee's" questions?

Did he go into enough detail to let us know whether these people that we landed down there were Cubans, were they Americans, what was their relationship?

Chairman Church. He did not go into that. We didn't have time enough to go into that detail. But I was left with the clear impression that they were agents -- by agents, usually the

Phone (Area 202) 544-6000

ARD & PAUL

0 First Street, S.E., Washington, D.C. 20003

CIA means foreign nationals who are --

Senator Tower. Foreign nationals?

Chairman Church. Engaged by CIA to perform a given mission and equipped, transported by the CIA for the accomplishment of that mission.

Senator Schweiker. Along the same line, I wasn't in on this conversation, but Colonel Fletcher Prouty has said very specifically that he helped to train these two people and we trained them and we landed them and tried to get them back out. They didn't come back out. If he is stating the truth there is no question we were fully involved in that with Castro.

Senator Hart of Colorado. I think you have stated one of the strong arguments against Barry's position, and that is that this is probably a whole subject area that is outside our control. Agents, former agents, friend of agents, are writing books, they are writing articles, bits and pieces of information coming out, and I agree with you that it undermines almost all of what this Committee was assigned to do to neglect to look into these things. It is outside of our control.

Chairman Church. Furthermore, it is weill within the scope of our resolution because we are not confined by our resolution in any way to look at the intelligence community only with respect to the domestic activities.

Senator Tower. No.

Chairman Church. That is another point. The Rockefeller

WARD & PAUL

Commission was originally assigned a very restricted mission to look into the domestic. It decided to expand its mission to investigate assassination question abroad.

Senator Tower. Mr. Chairman, may I suggest that we explore this matter with Colby, that the first thing we should do is ask him to come and give an overview of this thing for us and proceed from that point?

Chairman Church. I would like to do that. If we can get him to come at our Wednesday meeting, next Wednesday, and let me amplify your suggestion in this respect. I think this is the cmmmencement of the inquiry this Committee must make into the whole field of covert activity. This is the most extreme case of covert activity. But we must look into it all and I would propose the following inquiry into assassination which Colby should commence. We should then proceed to a series of hearings to get the details concerning present covert activity all around the world, and I must say I have seen some of it through the Foreign Relations Committee that is now required by law to get some kind of briefing, synopsis of covert activity, and a lot of it you just wonder why we are meddling in at such cost to the representation of the United States in such trivial matters, and how it could possibly benefit us to institutionalize this kind of operation all over the world.

Anyway that is another question. We have to find out what we are doing, why we are doing it, and what has been done in the

1.3

past in the field of covert operations. I think we have to commence with the assassination question simply because it is pressing and --

Senator Schweiker. I certain support you, Mr. Chairman, in this respect. I don't think we can duck, even if we wanted to, for the reasons everybody said. Either it is in the Rockefeller Report, in all agetn's books, and I think the place to begin, as Senator Tower says, let's see what we can find out and then determine what our responsibility is.

I just want to comment on the other aspect of the Kennedy thing. I think we have a little responsibility here to maybe rund down a few of the obvious contradictions because if we don't do that I think once again we will be accused of white-washing. I am not for getting into a whole big problem that is a secondary thing. I think there are discrepancies maybe we should spend a little effort running down. I don't advocate at all a big thing. I feel like the Chairman, it is hard for me to comprehend this. There are circumstances relating to former CIA people and I think we have a responsibility to at least look into to see if it is a dead end alley, and if it is, drop it or face up to it.

Chairman Church. There are two aspects to the question of assassination. One is the high level aspect relating to political leaders abroad. The other is assassination as it may have occurred or may be occurring at a lower level relating to

hone (Area 202) 544-6000

WARD & PAUL

O First Street, S.E., Washington, D.C. 2000

agents or employees that are engaged in covert operations. We must know about that.

As far as the Kennedy connection is concerned, my view, for what it is worth, is like Senator Schweiker's, I think we have to look very carefully at the question of whether or not the agencies came clean with the Commission, and if there is reason to believe that a full disclosure was not made, or if there are contradictions that need further explanation, I don't think it is the work of this Committee to undertake to determine whether or not the Commission's work was accurate or well founded, but I do think if we find this evidence we should say on the basis of these unanswered questions we think further inquiry into the matter is called for.

That is about as far as I think we can go.

Senator Tower. Mr. Chairman, I would certainly think that we should not try to reopen the whole matter. I don't think that the Senate intended that we should, although that was never discussed, and had that been debated on the floor it might have resulted in our getting our legislative history that would have proscribed us in that area. I don't know. But the Warren Commission was a prestigious group of people and I think that if we cast aspersions on them without being able to provide anything ourselves, we might be damaging our own credibility a little bit.

Chairman Church. I think we have to be very careful how

.18

.20

we handle it.

Senator Tower. I think we should certainly not suggest to the press we are going to look into that. That is going to blow up a whole row of snakes.

Senator Schweiker. And I don't suggest that, I don't think.

Chairman Church. Let's keep any reference to the Kennedy
assassination very carefully to ourselves. The only point I see
is to determine whether or not the CIA or the FBI may have
withheld, or if there are unanswered questions here that should
be answered, in which case we can say that, and that only
because you are right, the Commission was no doubt completely
honest, completely conscientious in the work it did, and there
has never been sufficient evidence brought to light yet upon
which one could conclude that their determination was not
correct.

Senator Tower. And you have got various people pursuing different aspects of it and I think any investigation of that type is going to come up with some inconsistencies and some dvidence that appears to be valid that conflict with each other. That happens in criminal trials. But I think we should proceed very cautiously along that line and not even hint to anybody that we are going to reopen the Kennedy assassination.

Senator Morgan. Let me put my thoughts on the record.

I think it is important that we explore this business of assassinations but I think it is extremely important that we

.16

TOP SECRET

we will disclose. If I have any feeling for the public sentiment of this country at all, I think I am right when I say that if we should disclose that the Government of the United States made a concerted effort to assassinate Castro or any other ruler, we will completely destroy the Central Intelligence Agency of this country.

There is no question in my mind that the public will demand it be disbanded or cleaned out.

Secondly, I think that foreign governments around the world, even those who are friendly to us, would demand that everyone that even was suspicious at all of being with the CIA be disbanded or be removed from their country.

It is inconceivable to me we would even think of such a thing in time of peace, and I can't help but believe that a public admission would destroy the intelligence system, and we have got to weigh in our own minds whether it is something we wish to hear here in the Committee room, take the necessary corrective action and report that we have taken it, or whether we are going to disclose the things to the whole world.

Chairman Church. That is a question we must face, I recognize that and I am not putting that question to us now.

Senator Tower. I fear the external reaction more than the internal reaciton. A lot of people in my State would say on the matter of the attempt on Castro, why didn't they get the son of

a bitch.

Chairman Church. We have now heard from Texas. That is the Texas view.

(Laughter)

Senator Morgan. Let me add, Mr. Chairman, for the staff's Shortly after this Committee was established, through a contact, a man and I cannot recall his name, contacted me after he had learned that either ABC or one of the networks or either the New York Times was going to print a story on assassinations, his name might possibly be mentioned as a maker of weapons, then became afraid himself, and I reluctantly agreed to see him. He came to see me. He brought plans, drawings of the assassination weapons that he prepared. He brought orders from the Defense Intelligence Agency as to how they were to be At first I was dubious delivered in person, paid for in cash. of him and I thought he was just another nut. But the man was frightened, extremely frightened. He came a second time with a lawyer as well as the intermediary, and I told him I would hold this information and at the proper time would turn it over to the staff.

He would by all means want to be subpoenaed, but if you will see me next week I will turn over all I have got to you.

But it is almost unvelievable the kind of weapons he manufactured His difference was he not only manufactured them but he had to teach the people how to use them. And he told me that the types

Phone (Area 202) 544-6000

WARD & PAUL

were Special Forces types, gung ho Marines, as he described
them where killing was second nature to them and, of course,
he is afraid now that having shown these individuals how to use
these weapons that they may think very well that he is going to
talk. He is not really interested in protection because he
says there is no protection that anybody can afford him. But
I will turn all this over to you next week.

Chairman Church. Senator Hart.

Senator Hart of Colorado. I was wondering, at least until the time of the Rockefeller Report, whether it would be feasible to pursue any proceedings along this line exclusively with the group here, that is to say, Committee members and the staff members here?

Chairman Church. Yes, that is my intention.

Senator Hart of Colorado. All right.

Chairman Church. That is my intention, to hold it as closely as possible, and, that is the way we will proceed.

Senator Tower. There may be some instances when they will request we have no staff.

Senator Schweiker. When Mr. Colby comes will he be under oath?

Chairman Church. Yes. The procedure I would want to follow, once we begin what I would call the serious investigations, just at the poin of doing that, that all witnesses who come to testify before the Committee be sworn just as witnesses

for whom depositions are	taken must be sworn. The kir	nd of
briefings we have had up	to now have really been very	prelimi-
nary, very informal, and	not too helpful.	•

Serator Morgan. If I could add one other thought that I meant to add earlier with regard to the disclosure of this.

As we have said earlier, it is one thing for a colonel so and so to write about Marchetti to write it and others, but it is another thing for an agency of Government to admit that it is true. So I think that is something we have to weigh.

Chairman Church. I know, we do and, Bob, the way that the Rockefeller Commission treats it will have a bearing on the way we may have to treat with it.

I don't know what we are going to be up against if the Commission makes its report in a way that discloses the fact and then this Committee is asked to provide the details.

Senator Morgan. If it does that we won't have much choice.

Chairman Church. Well, all right, one other thing that I would like to mention just for your comment.

A lot of refugees who have come into the country may have been brought in by the CIA, selected out of Vietnam and brought in. I don't know.

Senator Tower. I am certain.

Chairman Church. I would assume.

Senator Tower. Particularly those engaged in Operation Phoenix.

TOP SECRET

Chairman Church. And if they have been brought in, if the Operation Phoenix is what it has been described to me, we may have a bunch of political assassins in this country who have been doing that kind of work in Vietnam now brought in under the cloak, the protective cloak of the CIA on our hands.

It is a difference though between political assassination and conducting military operations in time of war.

I think we have got to, in the course of our investigation of covert activity, find out all that we can about the Phoenix operation, and I think we have to find out how many people connected with it who are Vietnamese, who may have a very different view of what a free government is all about, are now lodged with us in this country. That must come within the scope of our general inquiry into covert activity.

The other thing I would like to say is that I am very much disturbed over the possibility that the adams apple article,

Sam Adams article, which some of you may have read. Those of you who haven't should read it.

Senator Huddleston. Where is it?

Chairman Church. Harper's Magazine. It may be true. If it is true, if it is true it means that the CIA participated in a cover up, counterfeiting intelligence estimates of enemy strength in the field in order not to conflict with the official policy, which is in my view the ultimate corruption of the intelligence process. If that is the case, we need to know about it.

Phone (Area 202) 544-6000

ARD & PAUL

Senator Hart of Colorado. I raised that at my breakfast table, the Adams Artile, and officials sitting with me dismissed it as Adams always being kind of the mouthy kind.

Mr. Schwarz. We examined him for four days. He is more complicated than his article suggests. The numbers question is awfully hard to make concrete. We have got to find if there is any more direct evidence of manipulation than just playing with statistics, which is really largely his article.

Mentioned this before, but I feel we need to develop some staff system whereby each staff member will be continually brought up to date or furnished articles, materials that may be sensitive to some extent but yet could be permitted, that we could keep in our safes and read. You know it is a little difficult to come in here and sit down and digest everything, but also I am getting embarrassed to have to go buy Penthouse and Playboy. I believe there are more articles in those two.

Senator Tower. You have got a good excuse now.

Senator Morgan. That is what I have been saying. Really
I think maybe if we could have those articles --

Chairman Church. Let's try and handle this right now.

First of all, press articles dealing with the Committee or dealing with revelations or charges, relating to the work of the agencies we are investigating should be coming to members. The staff is supposed to be collecting those everyday and

circulating them to the offices of each member.

Is that happening?

Mr. Miller. That is happening.

Chairman Church. I haven't seen any in my office.

Senator Tower. I have gotten some.

Chairman Church. Once in awhile I have seen some.

Mr. Miller. I will check it.

Senator Tower. Maybe the staff is short stooking you. You have too much to read.

Chairman Church. Maybe so.

We should include in that any significant magazine article that in the judgment of the staff warrants the attention of the Committee members.

Senator Huddleston. You might make sure designating on the cover that it go directly to the Senator, because I think probably what is happening, some of our staff people are getting that, they are delaying it a little bit. We ought to indicate on the envelope, however it is delivered, it goes directly to the Senator, not through the normal process.

Senator Morgan. If you let our staff member hand deliver it to us.

By the way, I get a little feeling from my staff member that they are being left out. I don't know whether this is true or not. I had understood the entire staff was to work as a unit. That is the reason I throw that out. I got that from a

Phone (Area 202) 544-6000

couple of staff members I was talking to.

Anyway, one other thing, Frank. This may be an imposition to the staff but I assume somebody on the staff is going to read all of these articles, these magazine articles. In reading them, if they would prepare say a two-page outline summary of what is in them it would be helpful. I read all night and I still don't keep up.

Mr. Miller. On the question of articles and so on, we will add that. I am quite sure the newspaper things have been going everyday but we now have a press man, Spencer Davis, who has been assigned the task of reading everything and putting together a digest of everything and flagging that as of critical importance.

Senator Tower. Don't give us too much. I think just the reall good stuff, what is pertinent, because we could get inundated with this.

Mr. Miller. On the question of sensitive material, I would think the most sensible way within security would be to have Walter Ricks, in your case carry the material to you and he be responsible for it. Our problem is we have to know for our own protection, among other things, exactly where these pieces of paper are at every moment. We just can't take a chance. But why don't I be sure that everything gets to you through Walter and he be responsible for it and accountable for it?

TOP SECRET

410 First Street, S.E., Washington, D.C. 20003

Phone (Area 202) 544-6000

Senator Tower. It is a good idea to have two members of your staff cleared, get high clearances on them. I have got clearances on three of mine. Nobody else in my office handles classified documents except those people.

Senator Morgan. I had two thoughts on the sensitive material. I noticed in the first place sensitive appears only on the first page. It should appear on every page.

Mr. Schwarz. It was only the first page because of the assassination issue being mentioned on the first page and the other stuff we though in fact was not sensitive.

Senator Morgan. Can I assume unless the word sensitive appears on any given page that that is not sensitive?

Mr. Miller. Yes sir.

Senator Schweiker. What does the word "sensitive" mean?
Senator Tower. That is a low order of classification.

Mr. Miller. It means it is classified.

Senator Schweiker. It means classified?

Senator Tower. It is the lowest order of classification.

Mr. Miller. We have two for our own Committee purposes.

We have two classifications. The first reason is practically everything we handle is classified. The two orders of classification are those which most or all of staff can see because they have top secret clearance. The second order are those highly compartmented materials which have to be stored in a separate secure area and only those who have a need to know will

TOP SECRET

10 First Street, S.E., Washington, D.C. 20003

have	access	to	it,	in	addition	to	the	Senators.
------	--------	----	-----	----	----------	----	-----	-----------

Senator Schweiker. What do you call that?

Mr. Miller. We call it compartmented material.

Sensitive compartmented material.

Senator Schweiker. The two are what?

Mr. Miller. Sensitive and Compartmented.

Senator Hart of Colorado. One point on your first observation. The Cuban counterparts of the Vietnamese coming into this country, some of them became the Watergate burglars.

I think that is essentially what you are saying?

Chairman Church. Yes, I can see potential problems.

Senator Tower. We will get Ted Shackney in here to talk to us about that. He is the Station Chief in Saigon.

Chairman Church. That takes care of it. Thank you very much.

(Whereupon, at 12:35 p.m., the Committee was recessed, subject to the call of the Chair.)
